Conducted from 01.08.2025 -02.10.2025

Name of the Institution -

Chacha Nehru Bal Chikitsalaya, Geeta Colony Delhi-31

Date-

10.09.2025

Activity conducted

Cleanliness drive in the OT

OT Cleanliness and Its Importance in the Swachhta Drive

The Operation Theatre (OT) is one of the most sensitive areas in the hospital where maintaining high standards of cleanliness is directly linked to patient safety and surgical outcomes. A clean OT reduces the risk of surgical site infections and ensures a safe environment for both our paediatric patients and staff.

As part of the Swachhta Drive, OT cleanliness is ensured through the following key practices:

- 
- General Area Cleanliness – Floors, walls, and ceilings inspected to be kept dust-free, dry, and free from stains or seepage.
 - Equipment & Surfaces – OT tables, lights, monitors, and high-touch areas are disinfected before and after every case.
 - Air Quality & Ventilation – Air handling units and HEPA filters are maintained, with regular monitoring of positive pressure.
 - Sterile Zone Maintenance – Proper separation of sterile and non-sterile areas is followed, and instruments are handled aseptically.
 - Waste Management – Biomedical waste is strictly segregated in colour-coded bins; sharps are discarded safely.
 - Staff Hygiene & PPE – Scrub suits, caps, masks, and shoe covers are worn at all times; hand hygiene is enforced.
 - Cleaning & Disinfection – Mopping is done before, between, and after surgeries with hospital approved disinfectants; terminal cleaning and fumigation are carried out as per protocol.
 - Documentation & Records – Daily checklists and cleaning/fogging logs are maintained and reviewed
