

REPORT FORMAT-A

REPORT OF –“दिल्लीकोकूड़ेसेआजादी” -SWACHHATA CAMPAIGN

Conducted from 01.08.2025 -02.10.2025

Name of the Institution -	Chacha Nehru Bal Chikitsalaya, Geeta Colony Delhi-31
Date-	06.09.2025
Activity conducted	Cleanliness drive in the CSSD

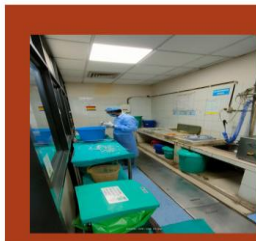

The Central Sterile Supply Department (CSSD) is the backbone of hospital infection control, as it ensures that all surgical instruments, linens, and medical equipment supplied to patient care areas are sterile and safe for use. Maintaining the highest standards of cleanliness in the CSSD is therefore essential to prevent hospital-acquired infections (HAIs).

As part of the Swachhta Drive, special emphasis is placed on the CSSD because:

- **Clean surroundings** in decontamination, packing, sterilization, and storage areas will reduce the risk of contamination.
- **Proper zoning and workflow** (dirty to clean to sterile) will ensure that sterile items are never compromised.
- **Regular cleaning and disinfection** of work surfaces, trolleys, and sterilizers will surely maintain a safe environment for staff and patients.
- **Good staff hygiene and PPE use** will protect both healthcare workers and the sterile products they handle.
- **Systematic waste management** prevents environmental contamination and supports national biomedical waste disposal standards.

Thus, CSSD cleanliness is not just about appearance, but a **critical infection control measure** that directly impacts patient safety, surgical outcomes, and the hospital's commitment to quality care. Incorporating CSSD into the Swachhta Drive reinforces the message that **“Clean CSSD means Safe Patients.”**
